## PCK REVISION KNEE

Tapered cemented **FEMORAL STEM EXTENSIONS** for both the femur and tibia are offered in a variety of diameters to meet specific patient needs

**PCK FEMUR**

- Patented box of the Freedom PCK provides a varying constraint profile from high constraint in extension to less constraint in flexion
- Built on clinical success of the Freedom Knee geometry to promote optimum size and shape for modern needs

**CONSTRAINED LINER** with pre-assembled liner securing pin to provide additional locking and stability while reducing locking tab stresses

Bone conserving, low profile **TIBIAL BASEPLATE** to manage poor bone stock or severe deformities

Reversible and stackable **AUGMENTS** allow for better match to the replaced deficient bone

360 degree rotating **OFFSET JUNCTION** allows for optimal canal filling and fixation

Canal filling **STEMS** with spline and flute design provide immediate rigid fixation and resistance to torsional movements. A flexible coronal slot provides a dynamic structure to address long-term endosteal bone changes

# Pursue Life™
